Projects

Description of projects using NEMO

This page is based on the informations kindly sent and updated by NEMO users since September 2008.

This page gives you an overview on the biodiversity of NEMO projects, and allows to find some interesting informations for your own project (shareable expertise on science, NEMO configurations, target platforms...).

Projects are listed by inverse order of "arrival": the more recent are first.

By adding inputs on your project here, you will gain more visibility in the community, you will help this page to stay meaningful, and help justifying the support for NEMO.

Thank you in advance for you contribution

To add your own NEMO Project, click on the "Add a Project" button.

Click on each line to find out more about a project.
